Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,335,472 to Phillips in view of U.S. Patent No. 1,862,831 to Ryan.

Regarding claim 1, Phillips discloses a metallic stud frame (fig. 2: 24) disposed on a vertical axis, having a central web and two perpendicular tabs extending from the web. Phillips also discloses the studs as being encompassed by concrete (fig. 2). However, Phillips does not disclose the stud tabs as being interdigitated with void spaces between and being staggered with opposing tabs. Ryan discloses a metal stud frame with studs having interdigitated tabs (see ears 10 in fig. 10). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Phillips by using the stud design of Ryan in order to better lock the cement to the stud when hardened. Applicant should also note that the limitation of in situ is a process of forming. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.

Art Unit: 3635

Regarding claim 2, Phillips discloses an inner insulating layer (fig. 5: 56).

Claim Objections

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 4-8 are objected for depending from claim 3.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited patents listed on the included form PTO-892 further show the state of the art with respect to concrete stud panels in general.
